

## SUMMARY

Full-stack developer and Queen's Software Design graduate who builds and ships production systems. Founded [Uforiya](#), a B2C SaaS platform for music creators, launched [Fint](#), a privacy-first finance tracker on the App Store, and architected the backend for [Revved Up](#), an accessible fitness platform that automated trainer workflows, earning an Honourable Mention at Queen's Creative Computing Showcase 2026.

## EDUCATION

Queen's University | Honours B.Comp in Software Design | September 2022 - June 2026

## VOLUNTEER EXPERIENCE

Queen's Black Tech | Lead Software Developer | Sept 2025 - May 2026

- Led React and TypeScript development for Queen's Black Tech's website, building core features to connect 100+ Black students with tech events and career opportunities.
- Mentored a cohort of interns with no prior coding experience on Git workflows and React best practices, guiding them to build website features independently.

QWeb Development | Frontend Developer | Sept 2024 - Apr 2025

- Designed the UI in Figma for the Queen's University Malayalee Association's client website, translating client requirements into wireframes and mockups.
- Built out the design in React as part of a 3-person team, collaborating to deliver the final handoff.

## PROJECTS

Revved Up (Capstone Project) | Backend Developer | Sept 2025 - April 2026 | [Live](#)

- Architected and developed a full-stack TypeScript/Node.js system as part of a 5-person team, converting a manual, paper-based trainer workflow into a fully automated digital system.
- Led requirements gathering across 4 months, interviewing kinesiologists and observing gym sessions to design role-based permissions for 4 user types, resulting in only 2 minor change requests at handoff.
- Deployed to Azure with SSL and SQLite to the queensu.ca domain, enabling 70+ users to access workout programs online.

Fint, iOS & iPadOS Finance App | iOS Developer | Swift, SwiftUI, CloudKit, Core Data, Xcode | [App Store](#) | [GitHub](#)

- Built Fint entirely on-device with no servers or accounts required, keeping users' financial data fully private on their own phone.
- Designed spending dashboards with budget alerts at 50%, 75%, 90%, and 100% thresholds, giving users real-time visibility into their finances.
- Built receipt scanning that reads a photo and logs the purchase automatically, with all data stored locally and optionally synced across Apple devices.

Uforiya, Music Collaboration Platform | Founder & Solo Developer | TypeScript, Next.js, Python, React | [Link](#)

- Architected and launched a B2C SaaS platform solo for musicians to collaborate remotely on unreleased music; live with 20+ users.
- Redesigned the audio processing pipeline to trigger only on upload instead of running continuously, cutting compute costs 10x and latency from seconds to milliseconds.
- Secured unreleased music and user data by enforcing permissions at the database level across 13 tables, making unauthorized access architecturally impossible.

## PROFESSIONAL EXPERIENCE

Digital Classroom Support Staff, Queen's University IT Services | Sept 2025 - April 2026

- Performed preventive maintenance and A/V diagnostics across 130+ classroom spaces, escalating specialized issues to senior technicians and keeping systems running reliably for class time.
- Responded to emergency support calls during lectures, quickly restoring mics, projectors, and displays to minimize disruption.

Teaching Assistant, CISC101 (Intro to Programming) | Queen's University | Sept 2023 – April 2024

- Delivered Python workshops to 200+ students, breaking down loops, functions, and data structures to help 50+ struggling learners grasp the basics and complete the course.
- Conducted 1-on-1 tutoring sessions that helped 50+ students debug code and go from zero programming knowledge to completing their first Python programs.

## SKILLS

- **Languages:** TypeScript, Python, Swift, JavaScript, HTML, CSS
- **Frameworks:** React, Next.js, Node.js, SwiftUI
- **Tools:** Git, GitHub, Figma, Azure, Vercel, Supabase, Cloudflare, Core Data, CloudKit, Xcode
- **Databases:** PostgreSQL, SQLite
